manufacture, subject to affixation of "Apostille" to the document or authentication by the Philippine Embassy/Consulate General, as applicable.

### **3. SPECIFY THE PROPOSED DATE OF INTRODUCTION OF THE PROVISIONAL SAFEGUARD MEASURE**

The provisional safeguard measure is scheduled to enter into force upon issuance by the Bureau of Customs (BOC) of the relevant Customs Memorandum Order (CMO). The Order signed by the Secretary of DTI was published in two (2) newspapers of general circulation on 29 November 2023.

### **4. EXPECTED DURATION OF THE PROVISIONAL SAFEGUARD MEASURE, IF ANY DECISION ON THE DURATION OF THE SAFEGUARD MEASURE HAS BEEN MADE**

The provisional safeguard measure will be in force for two hundred (200) days.

### **5. PROVIDE THE BASIS FOR:**

#### **(a) Making a preliminary determination, as provided for in Article 6, that increased imports have caused or are threatening to cause serious injury**

A review of the evidence made available to DTI shows:

1. That the volume of imports of LPG steel cylinders:
  - In absolute terms, imports of LPG steel cylinders accounted for more than 13,000 MT in 2017. In 2019, the rate of increase grew by 24% over the 2018 level. Imports sharply increased by 45% in 2020. In 2021, imports decreased by 13% but were still higher than the pre-surge level. The most recent data in 2022, slightly declined over the 2021 level but still higher than the pre-surge level;
  - In relative terms, the share of imports relative to domestic production continuously increased from 2019 to 2021.
2. That the increased imports caused serious injury to the domestic industry as follows:
  - Share of domestic sales to Philippine market exhibited a downward trend from 2018 to 2022, from a high of 58% to a low of 16%;
  - Imports share to Philippine market continued to increase by 42% in 2018, 66% in 2019, 73% in 2020, 76% in 2021;
  - Total production continuously declined from 2019 to 2021 by 34%, 36%, and 7%, respectively.
3. That increased imports were the substantial cause of serious injury to the domestic industry which was caused by increased imports based on the following:
  - The condition of competition showed that the market share of domestic product decreased during the POI. Imports continued to displace the domestic market and continued to cut into the industry's sales and market share from 2018 to 2022;
  - Domestic industry suffered significant impairment in its overall condition in terms of loss of market share, declining domestic sales, production, utilization rate, reduction in labor productivity, incurred losses and increase inventory.

#### **(b) Determining that there are critical circumstances where delay would cause damage which it would be difficult to repair**

The condition of competition shows that the market share of locally produced LPG steel cylinders was essentially displaced during the investigation as the share of imports in the Philippine market significantly increased. This has resulted to the domestic industry's loss of market share, declining

domestic sales, production, utilization rate, reduction in labor productivity, incurred losses and increase inventory. The negative financial status of the industry has made it increasingly difficult to get financing for its modernization, expansion, and operational requirements.

If the surge in imports will continue, the local industry will lose its market share to cheaper imported products. Without the local LPG industry, consistency and availability of local supply will be imperiled.

## **6. OFFER OF CONSULTATIONS**

The Government of the Philippines offers consultations on the provisional safeguard measures.
