The UK industry on whose behalf the application are those engaged in the manufacture of Welded Tubes & Pipes, as defined as the goods subject to review above.

SUMMARY OF THE REASONS FOR INITIATING THE REVIEW

The Application includes evidence that if the application of the anti-dumping amount expires:

- the dumping would be likely to continue or recur; and
- the injury caused by the dumping would be likely to continue or recur.

Having assessed the evidence provided in the Application, we consider that the Applicant has provided sufficient evidence to substantiate the need for an expiry review.

SUMMARY OF THE ISSUES INVOLVED IN THE REVIEW

When conducting an expiry review, we will consider whether:

- the dumping of goods is continuing or is likely to recur;
- the injury has been removed or reduced, in whole or in part, due to the application of the anti-dumping amount;
- the circumstances of the relevant exporting country or territory, or overseas exporter, are such that the injury caused by the dumped goods is likely to continue or recur; and
- the anti-dumping amount should be allowed to expire, should be extended, or varied.

SUMMARY OF THE REVIEW PROCESS

The review may involve the following:

1. inviting parties to register their interest in the review;
2. issuing a questionnaire to:
 - interested parties (other than the government of the foreign country or territory) who have registered an interest in the review,
 - contributors who have registered an interest in the review,
 - UK producers, importers and overseas exporters and overseas producers identified in the Application, and
 - any trade or business association of UK producers, importers and overseas exporters and overseas producers identified in the Application;
3. depending on the number of parties registering an interest in the review, we may consider it appropriate to limit examination to a sample of:
 - overseas exporters,
 - overseas producers,
 - importers,
 - categories of goods,
 - UK producers,
 - transactions for the purchase of the like goods in the UK, or
 - anything else we consider appropriate to sample;
4. verification to further assess and examine information, which may include verification visits and desktop verification;
5. analysing information gathered;
6. publishing a Statement of Essential Facts. We, will set a period of time during which parties will be able to comment on the Statement of Essential Facts.

7. determining whether to vary the anti-dumping amount, allow it to expire, or extend the measure; and
8. conducting an economic interest test when proposing to extend or vary the measure.

At the end of the review we will make a recommendation on whether the anti-dumping measure should be varied, extended, or allowed to expire. The Secretary of State will then decide whether to accept, reject, or ask that the TRA reassess the recommendation.
